These are certainly strong views in the item of "retrenchment and reform;" but we apprehend they will have been presented to Congress too late in the day. The decision respecting the House printing is, we take it, irrevocably fixed for a party, at prices not lower than 20 per cent. reduction upon the terms of 1819; and if that is found insufficient to satisfy the beneficiary, why, sir, there is nothing easier than to vote an extra douceur of forty or fifty thousand dollars, in the form of an incidental item in the bill of general appropriations.

It is useless to talk of economy, and practical printers, and experience in Congressional work, if these considerations are urged in opposition to the party press and its claims upon the party in the ascendant. Our friends had better at once relinquish the idea of securing the public printing through representatious of mere expediency and economy, if sposed to the principle of distributing the loaves to the faithful.

At this rate of reinforcements, we shall have a full quorum of the House by to-morrow evening.

We expect C J. McNulty, late Clerk of the Honse of Representatives, by every mail, as his trial for embezzlement of the public funds is to be resumed pending the term of our criminal court opening on

pending the term of our criminal court opening on Monday next. We are informed that McNulty intends contesting the seat of Mr. Delano, returned from the Coimmbus district in Ohio to the present Congress. It will be a profiless prosecution, if prosecuted; but we can scarcely accredit the rumor that it is to be, notwithstanding the high authority from which it is derived.

B B French appears to stand most prominent, to-day, as candidate for Clerk of the House.

We understand that Colonel John A Rogers, of Tena, a soldier of the late war under General Jackson, New Orl ans, and a soldier also of the Texas revolution, has a notion of running for Sergent at-Arms of the S nate. Experienced in legislative as in military tactics, there is scarcely one among the various candidates for this post who could bring in stronger credentials in tavor of his claim. Even as a wing, we should not despair of the gallant Colonel Rogers.

Brown's Hotel takes the stakes this season. They had to deny num-rous applicants this evening, for want of room. We expect such a session, as will yie d a harvest to all the hotels, from Galabrun's to the Depot.

THE GERMAN DIET VS. THE GERMAN PRESS OF THE United States.-We find in the Washington Union of Friday, 28th inst., the following letter from the Secretary of State to the publishers of cer. tain of the German newspapers printed in this country, baving reference to the edict of the German Dist prohibiting tile introduction of American-German newspapers into the Germanic States:

Diet prohibiting the introduction of American-German newspapers into the Germanic States:

Department of States:

Department of States:

Department of States:

Department of States:

Observed the honor to acknowledge the receipt of your communication, under date of the 10th inst., in which, after stating that you wish to transmit the rewspapers published by you "to the United States legatio, at Berlin, and other official functionaries of the United States in Germany," you measire:

First. "Whether the papers thus addressed will be considered as subject to the prohibition of German papers printed in the United States."

Becondly. "If (such papers be) intercepted, whether the proceeding will os acquiseced in by the government of the United States."

In reply to the first inquiry, I have to state, that the edict of the German Diet, pronibiting postmasters from delivering newspapers in the German language, publishing the United States, is understood as applying to every paper of this description, to whomsoever addressed.

In reply to the second, I have to observe that although the edict of the German diet must be condemned by every enlightened and liberal man on both sides of the Atlantic, still the regulation of its own post office, by such laws as to its own government may seem just and proper, as a right that belongs to every sovereign State. By no astion would the slightest pretension to interfere in any way with the exercise of this right, be more promptly rebuked than by ourselves; by none, therefore, should it be more scrupulously respected. In regard to the transmission of such publications to our diplomatic and other functionaries, residing in the States where their prohibition is the law of the land, and where postmasters are forbid to deliver them—it is evident that they could not reach their destination, except in consequence of their being exampted from scruuny, through the respect shown by the government towards those functionaries, and its confidence that they would not make this the means of violati

by our government; and it cannot, therefore, but recognize this as a duty toward other governments on the part of its functionaries residing abroad.

It is with much regard, therefore, that I feel compelled to deny myself the pleasure of sfording you the means through the agency of this department, of circulating your valuable and patriotic journals in Germany.

I am, gentlemen, respectfully, your ob't ser't.

JAMES BUCHANAN.

The accounts of the progress of manufacture in all parts of the Union continue remarkably favorable.

It is said that five handred thousand brick, from Coxsackie, are being landed at West Troy, for the building of factories at Conces.

The Academist, sublished in Lawrenceburgh, Tennessee, gives the following particulars in relation to the manufactures of Lawrence county:—The factory of Noah Parker runs 160 spindles, employs ten hands, uses thirty bales of cotton, and spins 30.000 dozen of thread. The capital vested in the establishment is \$3.000. The factory of John Woods runs 300 spindles, employs fitteen hands, consumes 150 bales of cotton, and spins 90,000 dozen of thread. Capital vested \$5.000. That of M'Knight and Parks runs 360 spindles, employs 16 hands, uses 160 bales of cotton, and spins 90,000 dozen of thread. Capital \$10,000. Simonton & Co's. run 240 spindles, employs 10 hands, uses 100 bales of cotton, and spins 60 000 dozen of thread. Capital, \$5.000. William Parks' runs 750 spindles, employs 35 hands, uses 225 bales of cotton, and spins 200,000 dozen of thread. Capital \$20,000. The whole amount of capital vested in these five factories is \$43,000; hands employed \$6; cotton consumed 665 bales; thread spun 485,000 dozen. There are two other spinning factories about to be erected.

It is stated that many new factories of the largest class, will go into operation within fifty or sixty miles of Newburyport, Mass., during the next season. Probably a larger number are going up within this circle, than in any other portion of the ceuntry. Toere is the mammoth mill at Portsmouth, with \$6,000 spindles, almost as many as all the six factories in Newburyport will have when completed and that at Salem, running 40,000 spindles. High up the Merrimack, at Manchester, two or three new mills of the largest class are being erected. At Nashus a large mill. At Dover, the Cocheco Company are Gione Mill will have 13,000 spindles and 825 looms, and the Ocean Mill 8000 spindles and 216 looms. In addition to all these, we learn by a gentleman from Lowell, that the Directors of the Lowell Manufacturing Company, voted last week to erect a new mill 320 feet long and 200 wide, five stories high, for the manufacture of Fower Loom Carpets. It will contain 50 Brussels and 250 Ingrain Looms.

Since the revivel of the manufacturing business, the demand for second-hand machinery has been very great,

MY EAU LUSTRAL HAIR RESTORATIVE.

This universally approved and admired article, free from artenis spirits, pungent essential oil, and other destructive materials, cleans the hair expeditionally, renders it beautifully bright, and imparts to it the discase fragrance of the flowers.—Hair washed with this Extract soon becomes pleasingly soft and luxuritant in its growth; and it will positively bring in new hair on baid heads by its use, and hair that has been much harsh, and is turning grey or falling out, by the use of spirit or other improver preparations, will soon be restored to its natural color and brilliancy by a few applications of the Eau Lustral. It is a preservative against baidness, and on infallible cure in all affections of the skin ou the head, as dundruff—and for preventing the felling off of the hair a durning grey.

It is the simple produce and immediate extract of some plants salvary for the hair, endowed with propercies so highly cleaning that it disengages the Epitermis and Capillary tubes of the corr. size action of the Perspiration, and of the dry and dead particles that it deposits. This preparation purines the hair, and gives to it a beautiful glass and softness, and an agreeable and vivifying perume.

EVIDENCE.

Nature is an inexhaustible muse, in which experience and study will always find room to excatate; it is that source, alone, which produces all that man calls invention, and which he would do better, perhays, te uname adaptations.
